-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

1. This Office action is in response to Application No. 10/688,548, filed 10/17/2003.
2. Claims 1-10 are pending.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-10 are rejected under 35 U.S.C. 103 (a) as being unpatentable over Boone et al. (U.S. Pat. No. 6,311,240) in view of Andric et al. (U.S. Pat. No. 5,449,200).

As per claims 1, 3, 4, and 6-10 Boone substantially discloses a system/method for assisting formatted data transfer that allows a formatting storage controller to read and record data on a formatted storage medium (which is readable as Applicant's claimed invention wherein said a method for selecting a media type format for which to generate value-bearing item indicia), said method comprising:

Receiving an input; and identifying a media type format (see., abstract, col 4, lines 13-31, col 5, lines 12-38, specifically wherein said the formatting storage controller may select by reference a number of on-media structure definition.

Boone fails to explicitly disclose the step of securing paper control number. However Andric discloses a security paper for incorporation in a security document, or other document having intrinsic value. The security paper includes a resinous substrate

sheet, on which indicia are printed (see., abstract, col 2, lines 3-26, col 15, lines 3-17). It would have been obvious to a person of ordinary skill in the art at the time the invention was made to modify the formatted data of Boone by including the limitation detailed above as taught by Andric because this would verify the authenticity of the documents or papers.

As per claims 2 and 5 Boone substantially discloses a system/method for assisting formatted data transfer that allows a formatting storage controller to read and record data on a formatted storage medium (which is readable as Applicant's claimed invention wherein said a method for selecting a media type format for which to generate value-bearing item indicia), said method comprising:

Receiving an input; and identifying a media type format (see., abstract, col 4, lines 13-31, col 5, lines 12-38, specifically wherein said the formatting storage controller may select by reference a number of on-media structure definition.

Boone fails to explicitly disclose the step of securing paper control number. However Andric discloses a security paper for incorporation in a security document, or other document having intrinsic value. The security paper includes a resinous substrate sheet, on which indicia are printed (see., abstract, col 2, lines 3-26, col 15, lines 3-17, it is obvious to realize that the security paper of Andric can also print label or label stock data since the security paper includes a resinous substrate sheet, on which indicia are printed). It would have been obvious to a person of ordinary skill in the art at the time the invention was made to modify the formatted data of Boone by including the limitation

detailed above as taught by Andric because this would verify the authenticity of the documents or papers.
